	21	6	58	6	2	7	44	16	16

This TABLE shews you the *Time* when the *Day breaks*, and when the *Twilight ends*, after the going down of the *Sun*; and the *Length of the Day* and *Night*, on the 1st, 11th, and 21st *Days* of every *Month*, throughout the *Year*, for ever; in the *Latitude* of 51 *Degrees*, and 32 *Minutes*.

Times Prohibiting MARRIAGE.

Marriage comes in on the 13th Day of *January*, and at *Septuagesima-Sunday* it is out again until *Low-Sunday*, at which Time it comes in again, and goes not out 'till *Rogation-Sunday*; thence it is forbidden until *Trinity-Sunday*, from whence it is unforbidden 'till *Advent-Sunday*, then goes out, and comes not in again 'till *January* next.

Here *Note*, That the *Exchequer* openeth Eight Days before any *Term* begins, except *Trinity-Term*, before which it openeth but Four Days.

The Use of the Two ensuing Tyde-Tables.

TO *find the time of* Full Sea, *or* High Water *in any of those* Places *mentioned in the Two ensuing* Tyde-Tables, *you must observe*, First, *the* Age *of the* Moon, *which you may easily find in the next following Table, wherein you have the* Moon's Age *every day throughout this Year*, 1720. *and having therein found out the* Moon's Age, *according to those Directions mentioned for that purpose in the side of the said* Table; *then have recourse unto the said* Tyde-Tables, *& look for the place desir'd in the* Head *of the said* Tables, *with the* Age *of the* Moon, *in the* Column *under the* Title *of the* Moon's Age, *and in the* Common Angle, *or* meeting *of those* Lines *in the* Column *under your* Place, *you shall have the time of* High-Water *and* Full Tyde *in* hours *and* minutes.

Yet Note, *That the* Tydes *do not fall out always exactly at the time found in these* Tables, *by reason of the* Difference *of the* Moon's Latitude, High Winds, Land-Floods, &c. *which do very often alter the Time; but this is the* Common Rule *generally given, for the finding of them.*

A TABLE of the Moon's Age every Day throughout this Year, 1720. whereby, with the help of the ensuing Tyde-Tables, the Time of High-Water, and Full Tyde may be found in those places there inserted.

Days	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.

Watch too faſt.

The 5 day, at 8 at night, *Mars* is with the *Mo.*
The 18 day, at night, *Jupiter* is with the *Moon.*
The 22 day, at 7 morn. *Saturn* is with the *M.*
The 24 day, at 5 at night, *Venus* is with the *M.*
The 26 day, at 8 morn. *Mercury* is with the *M.*

THE Planet *Saturn* all this Month is in the *Sign Scorpio*, Direct in motion, and is in *Sextile* to the *Sun* and *Mercury.*

Jupiter is in *Libra* all this Month, and is Direct in motion 'till the 8th day, from which day he becomes Retrograde, and ſo continues to the end of the Month, and is in *Trine* to the *Sun*, and in *Square* to *Venus.*

Mars is Direct in motion throughout this Month, and is in *Aries* until the 25th day, and then goes into *Taurus*, where he preambulates the reſt of the Month, and is in *Square* to *Mercury*, and in *Trine* to *Venus.*

Venus is quite through this Month Direct in motion, and is in *Sagitarius* 'till the 26th day, and the reſt of the Month in *Capricorn*, and is in *Sextile* to *Mercury.*

Mercury is ſlow in motion, and continues all this Month in *Capricorn*, and until the 14th day is Retrograde in motion, and Direct in motion all the month after.

On the 28th day of this month is an *Eclipſe* of the *Sun* at 10 in the morning, but will not be viſible to any part of *Great Britain* or *Ireland*, by reaſon the *Moon's South* Latitude is augmented by her *Parallax* in Latitude.

First Quarter the 5th day, at 10 in the morning.
Full Moon the 12th day, at 11 at night.
Last Quarter the 19th day, at 5 after noon.
New Moon the 27th day, at 2 in the morning.

Watch too ſlow.

THE 6th Day, at 2 in the Afternoon Jupiter is with the *Moon*. The 10th Day, at 5 in the Morning *Saturn* is with the *Moon*. The 23d Day, at 9 at Night *Mercury* is with the *Moon*. The 24th Day, at 1 in the Morning *Venus* is with the *Moon*. The 28th Day, at 9 at Night *Mars* is with the *Moon*.

Saturn is in *Scorpio* and *Retrograde* in Motion all this Month, and in Oppoſition to the *Sun* and *Mercury*, and in *Trine* to *Mars*.

Jupiter is all this Month in *Virgo*, and till the 10th Day is *Retrograde* in Motion, and all the Month after he becomes direct in Motion, and is in *Trine* to the *Sun*, *Venus*, and *Mercury*.

Mars is in *Cancer* direct in Motion throughout this Month, and in *Sextile* to *Venus*.

The glorious Planet *Venus* is direct in Motion all this Month, and is in *Aries* until the ſixth Day, and then goes into *Taurus*, in which Sign ſhe moveth the reſt of the Month, and is in *Conjunction* with *Mercury*.

Mercury moveth quite throughout this Month in *Taurus*, and is *Retrograde* till the tenth Day, and direct in Motion all the Month after.

This Month of *May* is likely to produce great and ſtrange Things in ſome *Northern* Countries, tho' I think Things are not yet ripe for what is intended, and the Stateſmen of *Europe* are at this time both alive and uſing double Dilligence to prevent further Differences amongſt Chriſtian Princes, which ſtands fair for an Accommodation.

First Quarter, the 2d Day, at 6 in the Afternoon.
Full Moon the 9th Day, at 8 in the Morning.
Last Quarter, the 16th Day, at 1 in the Afternoon.
New Moon the 24th Day, at 3 in the Afternoon.

Saturn is throughout this Month in *Scorpio* direct in Motion, and at the beginning of the Month is in *Sextile* to *Mercury*, and *Square* to *Venus*, and towards the end in *Sextile* to them both.

Jupiter has lately entred *Libra* the *Sign* of Justice, and is direct in Motion all the way through this Month.

Mars the first Day of this Month goes out of *Leo* into *Virgo*, where he continues the rest of the Month, and is in *Conjunction* with *Venus* and *Mercury*.

Venus is direct in Motion all out this Month, and is in *Leo* till the fourteenth Day, and then goes into *Virgo*, where she preambulates the rest of the Month, and is in *Conjunction* with the *Sun*, &c.

Mercury is in *Virgo* all this Month, and is direct in Motion until the eighteenth Day, and from thence he is *Retrograde* in Motion the remaining part of the Month; and the last Day of this Month is in *Conjunction* with the *Sun*.

Things at the beginning of this Month seem calm and easy, for the Aspects are not many nor very material; but towards the latter end of this Month, or beginning of the next we may expect to hear of some Martial Exploit in some *East* or *South-East* Countries.

Full Moon the 5th Day, at 3 in the Afternoon.
Laſt Quarter, the 13th Day, at 5 in the Afternoon.
New Moon the 21ſt Day, at 3 in the Morning.
Firſt Quarter, the 27th Day, at 6 at Night.

Here follows a Brief Chronology of memorable T
ſince the Creation of the World; tho' the time of it
ation has been, by what follows, altogether uncertain.

For { From the Creation of the World, } juxta { *Orientalis Eccleſiæ tradita* / *Occidentalis Eccleſiæ tradita* / *Hebræos & Judæos recentiores* / *S. Lit. & Hiſt. fide digniores* }

I ſhew'd in my laſt Year's *Ephemeris*, as here,
Mr. *Partridge*, in his Almanack 1701, hath taken a
deal of Pains, and ſeemingly to a good and wa
ble End: Where he hath ſubſtantially proved from
Writ, that our Bleſſed Saviour was born in the Year o
World 3962; to which add 1720. the Date of this p
Year, and it makes 5682 Years ſince, or from the Cre
of the World. And for a farther Confirmation, *Jo*
the Jewiſh Hiſtorian, in the firſt Chapter of his Antiqu
affirms that the World was created before Chriſt's Na
3963 Years; he then accounts the Year of the Wo
which taken from the aforeſaid Number 3963, bring
theſe Accounts to one, and a Confirmation to
both.

The Use of this Table is, to find the exact Time of t Rising, Southing, and Setting of the Fixed Stars the and first,

Of their Southing.

om the Right Aſcenſion of the Star found in this Ta- ſubſtract the Right Aſcenſion of the Sun, the Remain- is the true time of that Fixed Star's coming to the h.

Example.

his preſent Year *April* 24 Day, I would know what Hour Minute the Star *Arcturus* comes to the South.

	H.	′	″
ght Aſcenſion of *Arcturus* (12 ho. add.) is	14	03	20
ght Aſcenſion of the Sun, ſubſtract	2	53	6
Arcturus South at Night	11	11	14

nd if the Riſing or Setting be required, take out the i.iurnal Arch of the ſaid Star, which ſubſtract for the , and add for the Setting to or from the Southing be- found; ſo have you the Riſing and Setting given.

Example.

	H.	′	″
he time of *Arcturus* Southing, as before	11	11	14
idiurnal Arch { for the Riſing, ſubſtract / for the Setting, add }	7	55	10
rcturus riſes After noon at	3	16	4
Arcturus ſets next Morning at	6	06	24

ſhall here add farther, that great and curious Enqui- have been made for finding the Magnitude and Diſtance he Fixed Stars from the Earth; and the beſt Account given, is, what I find in Dr. *Harris's Lexicon Techni-*, where he tells us, That the incomparable Sir *Iſaac ton*, in the *Latin* Edition of his *Opticks*, by Mr. *Clarke*, to Page 83 added this Note; by which we may con- the Fixed Stars to be at an immenſe Diſtance from *viz.*

That the Fixed Stars, by reaſon of their immenſe Di- ce, are to be look'd upon as Points, (unleſs ſo far as ir Light is dilated by Refraction) is plain from hence t when, by the Moon's Appulſes to them, they are

Eclipſed, or cover'd by her Body, their Light doth
like that of the Planets in the like caſe, vaniſh or diſapp
gradually, but at once and all togethers; and when the
merge again out of the Eclipſe, they don't become vi
by Degrees, but, as it were, inſtantaneouſly, or, at leaſt
the Space of 1 or 2 Secondi.

Beſides, Dr. *Cheyne* adds this farther Gueſs at the Imm
ſity of the Diſtance of the Fix'd Stars.

Tho' we on this ſide the Globe approach nearer to ſo
of them about 24000 Diameters of the Earth, *i. e.* ab
188304000 Miles, (of 5000 Foot in a Mile) at one tim
the Year than we do at another; yet their Parallax,
any at all, is ſcarcely ſenſible; which it muſt be, if t
were at an eſtimable Diſtance from us.

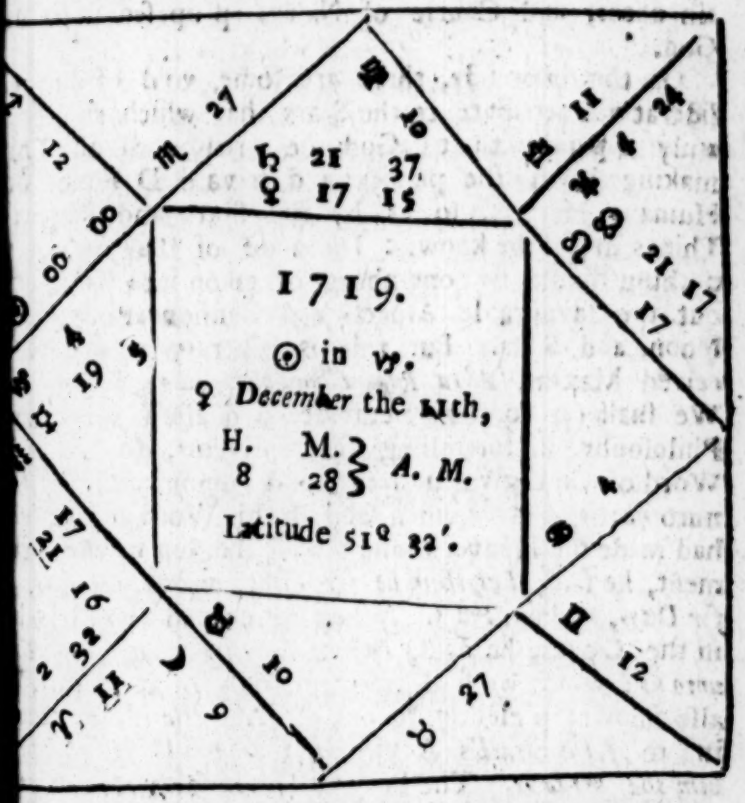
Mr. *Hugens* computes, That the Diſtance of the Sun
that of the neareſt Fixed Star, is as 1 to 27664, that
(allowing the Diſtance of the Sun to be 12000 Diame
of the Earth, and a Diameter to be 7846 Miles, accord
ing to the beſt Calculations) the Diſtance of the neareſt Fi
Star is at leaſt from us 240452092800o Miles, which
ſo great, that if a Canon Ball (going all the way w
the ſame Velocity it hath when it parts from the Mouth
the Gun) would ſcarce arrive there in 700000 Years.

The Fixed Stars have no diurnal Parallax, but, as ha
lately been diſcover'd by Dr. *Hook* and Mr. *Flamſteed*
ſmall one annually, and conſequently their Diſtances m
be immenſly great. The Light of the Fixed Stars is mu
more ſtrong and vivid than that of the Planets, tho' th
apparent Diameters are much leſs; becauſe the Stars, li
the Sun, ſhine by their own Native Light, but the Plan
only by Reflexion from the Sun.

The Fixed Stars are obſerv'd to twinckle much mo
than the Planets; becauſe their apparent Diameters bei
very inſenſibly ſmall, the leaſt Atom or Particle of Matt
floating in our Atmoſphere will hinder (for a Moment) t
Stars being entirely viſible. As the groſs Smoak of a Chi
ney will do by the Planets themſelves, which in ſuch a ca
will twinckle; and that there are Changes and Alteratio
among the Fixed Stars, hath appear'd by the Obſervatio
of our Modern Aſtronomers.

So

ne Obſervations on the Sun's Ingreſs into Capricorn, *in* December 1719.



Efore I come to conſider what the Tranſactions of th's Winter Quarter may be, I ſhall briefly conſider Divine Art of *Aſtrology*, as by wiſe and learned Men been approved of in al Ages of the World, ſo as rein we reach no further than becometh human Ca-ity; and is a commendable Manifeſtation of Wiſdom Judgment, and the Gifts and Bleſſings of God for ch we ought to be thankful, and to yield due Honour Praiſe unto his moſt holy Name, for the noble Order ch he hath appointed in Nature, praying him to illu-ate our Underſtandings, that we may more and more

profit

profit in the true Knowledge of the Workmanship of
Hands. But some there are that deny those Things
in Nature have manifest Causes, and so framed, as
foreshew Things to come; and from thence admonish
of Things to come, exhibiting unknown and future C
tingences, and Course of Nature proposed unto us
God.

On the other side, there are some, void of due C
sideration, attribute to the Stars that which rightly
truly appertaineth to God the Creator of all Thi
making them the publick and private Destinies of
Humane Matters, so as by the Stars and Planets
Things might be known: These are of that Stamp,
nothing should be gone about, or taken into Hand, wi
out the favourable Aspects and Configurations of
Moon, and Stars. But this is contrary to the old
ceived Maxim, *Astra Regunt homines, sed regit astra D*
We shall (as formerly) embrace and allow this part
Philosophy, in foretelling future Events, so far as
Word of God gives us leave, and commendeth the s
unto us: Therefore when God, by his Word and Wisdo
had made the Heavens, and placed the Sun in the Firm
ment, he said, *Let them be for Signs, and for Seasons,*
for Days, and for Years. When he created the Rain-b
in the Clouds, he said, *It should be for a Sign and To*
unto us; which we find true, not only of Rain past,
also Showrs presently to ensue. And therefore, acco
ing to *Jesus Sirach*'s Advice, *Let us behold it, and pr*
him that made it. The Prophet *David* saith, *The Hea*
declare the Glory of God, and the Earth sheweth his ha
Work: Day unto Day he uttereth the same, and Night
Night teacheth Knowledge. It is also written, *That by*
Commandment of the Holy One, the Stars are placed,
continue in their Order, and fail not in their Watch. It
pears, that Christ himself did not altogether neglect
Course and Order of the Heavens, in that he said, *You*
a Cloud rise out of the West, straight way you say, a Sh
cometh, and so it is. And when you see the South Wind bl
you say, It will be hot, and so it cometh to pass. Ag
when it is Evening, you say, Fair Weather, for the Sky

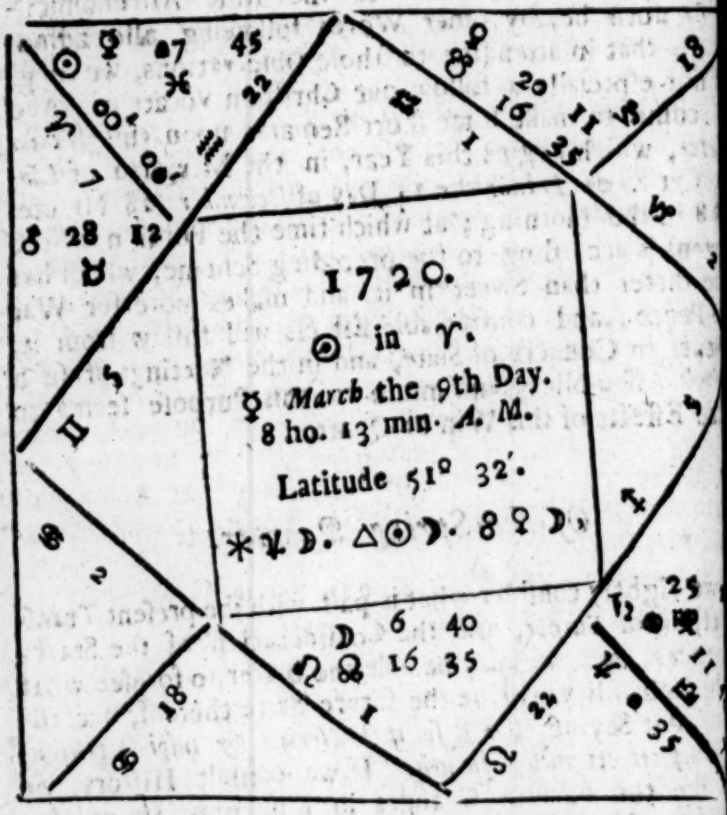
and in the Morning, you say, To-Day shall be a Tempest, the Sky is red and lowring. Wherein he noteth, that e Things do truly come to pass, according to the ent Observation, and to the Rule Astronomical- so doth he, by other Words following, also admo- us, that in attending to those Observations, we neg- not especially to follow our Christian Vocation. And come to make some short Remarks upon this *Winter rter*, which begins this Year, in the Meridian of *Lon-* 1719. on *Friday* the 11 Day of *December*, 28 Minutes 8 in the Morning; at which time the Position of the vens is according to the preceding Scheme, which has e Bitter than Sweet in it, and makes more for War Peace; and considerable Effects will follow from it, eats in Councils of State, and in the Meetings of such lick Assemblies; and more to this Purpose seems to he Effects of this Winter Quarter.

Of the Spring Quarter.

we rightly consider what is past with the present Transactions of *Europe*, and the Consideration of the Starry ences, *&c.* we may be able the better to foresee what l Probability will be the future State thereof, accord- to that Saying, *Qui Respicit præterita & inspicit præsen- prospicit etiam & futura.* If we consult History, we see the various Changes in Kingdoms, States *&c.* of the Mutability that is in Men's Minds, of the Fraud Falshood in the Performance of their Promises and enants; and let but any sensible Man observe the ons of People of all Degrees, and they may readily over Oppressions, Undermings, Princes tyranni- over the People, Subjects rebelling against their ces, and People quarrelling one with another, and i e kinds of Vexations, and all for a handful of Earth. what is the Cause of all this, but Pride, Ambition, touſneſs, Tyranny, whimsical Opinions in Religion, lastly, Injustice, for which the World has suffer'd so y Changes. Justice is the Pillar upon which States

and

and Kingdoms ſtand, remove that, and down falls Temple of Government. 'Tis the Sun illuminates all



cieties; 'tis the Band that ties People to their Governo and, in fine, 'tis the Life of all States and Domini *Plutarch* tells us, that *Paulus Æmilius*, who ſubdued P ſeus the *Macedonian* King, ſpent all his idle Time in Re in of Hiſtories, which made him ſo good a Soldier.

We may read from the Second *Macedonian* War, A *Mundi* 3790, in at leaſt 1900 Year, we ſhall find u the Theatre of the World, the ſame Tragedies of W Plagues, Famines, Oppreſſions Tyrannies, Thefts, M thers Fires, Earthquakes, Inundations, Maſſacres, R of Caſtles, Temples, Palaces, Diſſolution of Coun

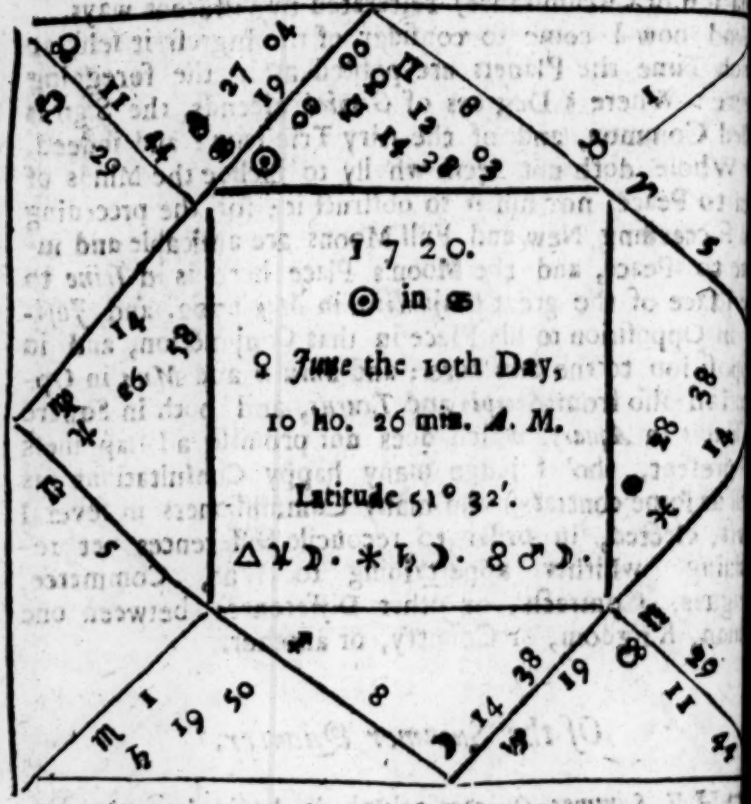
Kingd

gdoms, and Common-wealths, Devastations of Towns Cities, Alterations of Laws and Governments, *&c.* y, you will yet see the same Tragedies (with some ia ion of Circumstance) reiterated by different ways. And now I come to consider of the Ingress it self, at ich Time the Planets are posited as in the foregoing ure: Where 5 Degrees of *Gemini* ascends, the Sign is ed Common, and of the Airy Triplicity; and indeed, Whole doth not seem wholly to incline the Minds of n to Peace, nor mu h to obstruct it; for the preceding succeeding New and Full Moons are amicable and in- e to Peace, and the Moon's Place here is in *Trine* to Place of the great *Conjunction* in *May* 1702. and *Jupi-* in Opposition to his Place in that Conjunction, and in position to the *Sun* here; and *Saturn* and *Mars* in Op- ition also from *Scorpio* and *Taurus*, and both in Square *Venus* in *Aquary*, which does not promise all Happiness present, tho' I judge many happy Consultations (as ll as some contrary) and many Commissioners in several rts, elected, in order to reconcile Differences yet re- ining, whither appertaining to War, Commerce, agues, Contracts, or other Differences between one ion, Kingdom, or Country, or another.

Of the Summer Quarter.

THE *Summer Quarter* taketh its beginning when the glorious Lamp of Heaven, the Sun, enters the first up'e of the Tropick of *Cancer*, which happens this ar on *Friday* the 10th of *June*, 26 Minutes past 10 in Forenoon, when 14 Degrees of *Virgo* ascends, and 8 grees of *Gemini* is upon the M. C. *Saturn* being at the e aforesaid in *Trine* to *Mars*, and in *Sextile* to *Jupiter* the *Moon*. *Jupiter* is in *Sextile* to *Mars*, and in Square *Venus* and *Mercury*. The *Moon* applying to the *Trine* of *piter* and *Opposition* to *Mars*. *Venus* and *Mercury* are in *junction* in *Gemini* in the 10th House: This, with the and Postventional Full and New Moon consider'd, na- ally points out what is like to happen, which commonly produceth

produceth a good Understanding in the main, and hearty Endeavours of great Men to qualifie such Ed



Constitutions, or Laws, either of Princes or Comm wealths, as have given Occasion of Offence. And the great God, which made and governeth all Thi incline the Hearts of all good Men, qualified for so g an Undertaking, to bring to pass so good a Work. *ins palato, sic ins instio arridet.*

Of the Autumn Quarter.

THE *Autumn* or *Harvest Quarter*, begins at time as the Sun enters the Equinoctial Sign *L*

ich happens this Year in the Lati ude of *London*, on nday the 12th of *September*, 21 Minutes past 2 in the rning; and at that time 22 Degrees of Leo rifeth in East Hor zon, and 8 Degrees of *Taurus* is upon the -Heaven: And as I have not room to incert the Figure he Heavens at the time of this Ingress, I shall here set wn the principle Configurations and Aspects at that e. And here I observe, that the Proventional Full on falls in *Trine* to *Saturn*, and in *Opposition* to *Mars Mercury*. And the Postventional New Moon happens r the Places of *Mars* and *Mercury*, and in *Sextile* to urn The Planets Places follows, *viz.* ☉ 00° 00′ ♎. 12° 07′ ♊. ♄ 22° 03′ ♏. ♆ 12° 27′ ♎. 26° 33′ ♍. ♀ 7° 35′ ♎. ☿ 13° 50′ ♍. 7° 51′ ♌. The Aspects, ☌♄♂. ☌♄☿. ☌♆♀. ♂☍♆. △♆☽. △☉☽. △♀☽. □☿☽. the ☽ applying to the Square of *Mars*. In all this, e doth not appear any Grounds for either Fears or lousies, but rather a Calm, fruitful, and hopeful Time, produces Things very remarkable as the Effects thereand may rationally be hoped, they may be such as tend to a general Good; for certainly, great are the ncils and Consultations about this Time, not only in ope, but in other Parts of the World also, and Alterons may be expected, and remarkable Things well th Observation. And to conclude, Peace and Plenty attends the *English* Nation. God preserve our Sovegn King *GEORGE*, and continue these his Blessings amongst us, and give us all thankful Hearts for the e.

William Andrews.

FINIS.
